NIGHTLINE

**CONTINUOUS ROW VERSION
WITH MODULAR STRUCTURE**

**LIGHT FROM
BEGINNING
TO END -
WITHOUT
INTERRUPTION**

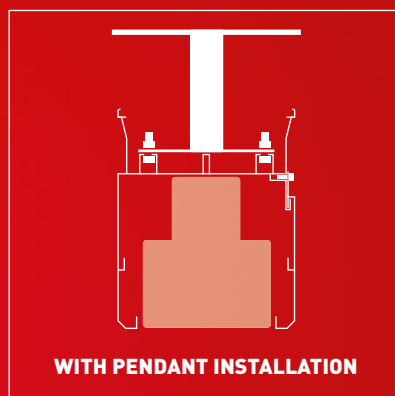

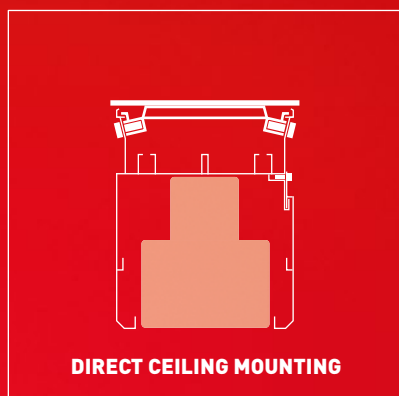

NIGHTLINE: PREASSEMBLED FOR QUICK MOUNTING

With the NIGHTLINE continuous row version; we offer a maximum of quality, protection rating and ease of mounting for large areas such as railway platforms, production or logistics halls or swimming pools. In short: A robust, homogeneous continuous row system without dead zones for your lighting tasks. NIGHTLINE offers particularly fast, safe and stable installation thanks to pre-assembly and a modular design. The plug-and-socket system used connects the pre-assembled luminaire inserts quickly and safely. And the carrier profile offers sufficient space for additional cables so that emergency luminaires, loudspeakers or cameras can be integrated into the continuous row system.

ADVANTAGES OF THE NIGHTLINE CONTINUOUS ROW VERSION

- Modular design and interchangeable components
- Plug-and-socket system for fast connection
- Protection rating IP 65, protection class II
- DALI optional
- Through wiring 5 x 2.5 mm² or 7 x 2.5 mm²
- L80 B10 > 60,000 h
- The carry-along of additional cables and recessed mounting of loudspeakers and cameras possible
- Variable positioning of the mains supply
